

# Knowlton

Hello. My name is Knowlton. For those of you not familiar with the name, it's an old English name that may date back as far as the Middle Ages. I'm not saying I date back to the Middle Ages but I do have an honorable lineage. You can probably see it by looking at me as well. And you'll definitely know the minute you meet me: I'm very affectionate and quite the purr machine. I love having my ears and chin (really, anything in the head area) scratched and also love just hanging out nearby. I'll curl up on the floor next to you and keep you company. I'm quite the conversationalist and enjoy chatting when I am happy or excited. I also enjoy sleeping on the bed - or at least on my own pillow next to the bed. As just like how humans like some people and not others, I seem to like some kitties and not others. For example, I really like the foster kitty that I am living with. So go figure☺ I am also learning to play with catnip toys. I'm FIV+, which is NOT the death sentence that many people think it is. I can live a long and healthy life. And the latest thinking in vet circles is that FIV+ and FIV- cats can live together if they get along. I'm a big boy at 14 pounds and three years of age. I have been neutered and microchipped. Here's my fabulous video at
